EUROAVIA Ideathon 2026 – Advionics challenge

Oostende

POWERED BY EUROAVIA

Table of Contents

1 Problem and goal 3
1.1 A second-level heading 3
1.1.1 A third-level heading 3
1.1.1.1 A fourth-level heading 3
2 References 5

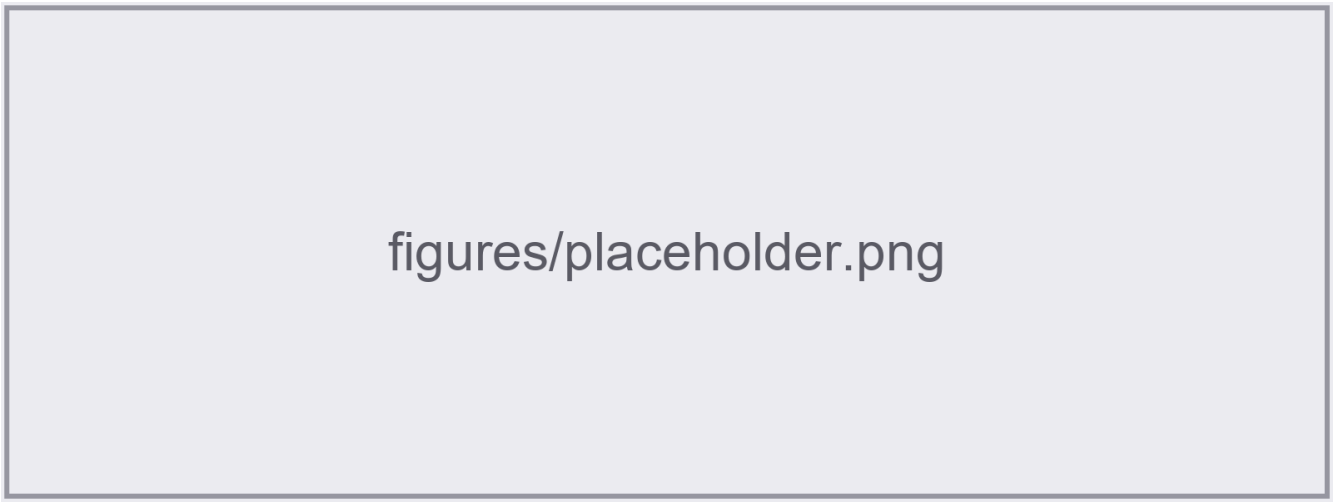

Figure 1. Figure captions sit under the picture. Write the finding as a sentence.

1 Problem and goal

Body text is Montserrat 11 on Word's line spacing, justified, with 8 bp after each paragraph – just type paragraphs as usual. Cite sources with `\cite`, for example the accident report [1] or two sources at once [1, 2].

A list:

- first point, with a bullet from the Symbol font as in Word;
- second point.

Text after the list.

1.1 A second-level heading

Headings: `\section` (Heading 1), `\subsection` (Heading 2), `\subsubsection` (EA Title 3) and `\paragraph` (Title 4). All are numbered and go into the contents. Use the starred form for an unnumbered heading.

1.1.1 A third-level heading

Figures and tables float to the top or bottom of a page, 12 bp away from the text, like the floating tables in the EASA report.

1.1.1.1 A fourth-level heading

Refer to Figure 1 and Table 1.

Table 1. Table captions sit above the table.

Item	Description	Value
One	Cell text is Montserrat 7.5 with 1 bp above and below.	1.5
Two	A longer cell wraps inside its column, the row grows.	22.3
